

## Smoke alarm Ei650 w/ microprocessor

---

Art.Nr.: S32200006

---

---

Smoke alarm Ei650 w/ Microprocessor and 10-year-lithiumbattery.

The Ei650 is a smoke alarm of the new generation with integrated microprocessor and automatic pollution compensation.

The smoke detector works on the principle of scattered light and has a built 10-year lithium battery. Its easy-press button, the mute function and the elimination of annoying flashing LED signals make it particularly user-friendly.

- Fixed 10-year lithium battery
- Integrated 85dB (A) strong piezo alarm
- Large, easy-to-reach easy-press button
- Reduced test volume
- Mute function for unwanted alarm
- Automatic contamination compensation
- Metal shield in the optical chamber
- Against dismantling
- Incl. Mounting plate for easy installation and maintenance
- Approvals: VdS-DIN EN 14604
