

Smoke alarm Ei650W w/ Microprocessor and 10-year-lithiumbattery.

Art.Nr.: S32200007

Smoke alarm Ei650W w/ Microprocessor and 10-year-lithiumbattery.

The Ei650W is a smoke alarm of the new generation with integrated microprocessor and automatic pollution compensation.

The smoke detector works on the principle of scattered light and has a built 10-year lithium battery. Its easy-press button, the mute function and the elimination of annoying flashing LED signals make it particularly user-friendly.

The Ei650W can be connected with the RF module Ei650M to other smoke alarms.

Fixed 10-year lithium battery

Integrated 85dB (A) strong piezo alarm

Large, easy-to-reach easy-press button

Reduced test volume

Mute function for unwanted alarm

Automatic contamination compensation

Metal shield in the optical chamber

Against dismantling

Incl. Mounting plate for easy installation and maintenance

Approvals: VdS-DIN EN 14604
