Heat alarm 10 year lithium cell powered Ei603C-D

Art.Nr.: S32200015

Heat alarm 10 year lithium cell powered Ei603C-D

- Practically eliminates false alarms.
- The Ei603C-D has a 10 Year Lithium battery that is non replaceable.
- RadioLINK enabled smoke and/or heat alarms can be house coded as a system to prevent communication with other nearby RadioLINK systems.
Aesthetically pleasing, compact design

The heat detector will alarm when the temperature reaches 580C. It will automatically reset and silence the alarm when the temperature drops below this limit.

The built in sounder will provide a minimum sound output of 85dB(A) @ 3m.

The red indicating LED will flash once every 40 seconds to show that the alarm is powered and it has performed an automatic power supply test.

Pressing and holding the “Test” button will check the sensor, electronics and sound the horn.
