

Breathing Apparatus Dräger PSS 5000

Art.Nr.: 3358355

Self-contained breathing apparatus (SCBA) Dräger PSS 5000 DP, EN 137: 2006 Type 2, vfdb 0802,

Basic unit with Bodyguard 7000 and universal bottle strap for single cylinders and 2 cylinders, usable bottle sizes are 6 l, 6.8 l and 9 l, 4 l bottles can not be used.

Carrying shell of carbon fiber reinforced material, medium and high pressure hoses are protected accommodated in the carrying shell, thus preventing snagging in use or when donning and doffing. The grippy anti-slip surface of the harness ensures that it remains in position and the SCBA safe against the body.

By grippy medium pressure coupling allows the regulator to solve quickly even when wearing gloves. Pressure reducer with air delivery > 1000 l / min, enough for 2 people, can be equipped with optional adapter with check valve for a second regulator or a hose supply.

Banding of aramid, the closed cell material reduces the absorption of dirt and greatly facilitates cleaning and decontamination.

Adjusted and rotated lap allows for great freedom of movement individually adapted to the equipment rack and provides good weight distribution, pull forward pelvic adjustment strap, snap closures at the shoulder and lap belt allow easy assembly and disassembly without tools.

Professional design for maximum load requirements with daily use under extreme conditions, buckles made of stainless steel for high mechanical and thermal resistance.

DrägerMan Bodyguard 7000, automatic activation when you crank up the bottle, automated functional testing, entering a user identification on the personal identity card (RFID), permanent position flashing light, automatic alarm in immobility, manual emergency alarm. Data Recording (Data Logger), the data can be read via an interface on a PC.

Weight: 4 kg

Including power supply and electronics for optional head-up display, about 4.60 kg

Note: Design for 4 liter bottles on request
