B-master MIDI panel for barriers

Art.Nr.: AK910001

B master MIDI panel for barriers, for filling standard pressure cylinders in paintball
pressure container sizes : 0.8 ltr / 1.1 ltr / 1.5 ltr / 1.9 ltr
filling pressures : 200 bar / 300 bar
(two valves , one pressure, without its own safety valve without pressure reduction)

-filling panels for "" table-top mounting "" with closed panel housing plastic
-attached using four holes on the underside of
-direct valve actuation
-automatic air vent
-valve clearance adjustable
-setting the upper and lower valve stop
-stainless steel valves with more than 100,000 switching cycles
-pressure input on the rear panel
-possibility of pressure distribution at several filling panels on tee
-filling hose connection on the rear panel
-space in front of the panel remains free

This version does not have a safety valve nor its own pressure reduction. Therefore, the inlet pressure must already set to the desired fill pressure (200 and 300 bar) and the input line must be protected accordingly.
The filling pressure in the pressure vessel via a pressure gauge in bar/psi.

It can be filled at the same time at both filling valves with the same discharge pressure, filling with

different filling pressures is not possible.
