B-NITROX MEMBRANE SYSTEM

Art.Nr.: HA100016

B-NITROX MEMBRANE SYSTEM

- 260-450 l / min | 225 bar
- Production of oxygen-enriched breathing air to 40% O2
- No supply of oxygen necessary
- Particularly safe by temperature and pressure monitoring

Included B-NITROX MEMBRANE complete system

I. LOW PRESSURE MODULE
Produced and compresses the amount of air necessary for the membrane

II PURIFICATION MODULE
For the residue-free removal of hydrocarbons (oil)

III. OX MODULE
enriches breathing air with oxygen

IV. HIGH PRESSURE MODULE
Compaction of nitrox mixes bar Optimized for PN 200 for the compression of Nitrox up to 40% by a low densification temperature, a complete temperature monitoring at all levels and the use of nitrox suitable lubricants.

Specification

Volume: cc 0
