SECCANT 3 A Dryer / 90-350 bar

Art.Nr.: AT190013

Adsorption SECCANT 3 A
For drying and oiling of the compressed air
- Operating Print 90 - 350 bar
- Flow rate 500 - 1500 l / min

Scope of supply:
1 console , it cultivated :
Upstream oil and water separator with automatic condensate drain , the dryer unit -
- 2 dry filter with molecular sieve cartridges
- Downstream filter with activated carbon cartridge
- Automatic switching device with pressure compensation
- Pressure maintaining / non-return valve
- Safety valve for system pressure
- Solenoid valves
- Pressure regulator with safety valve
- Manometer to control operating or regeneration pressure
- Particulate filter with filter cartridge
- Silencer for noise reduction on the regeneration air output
- Electronic control B - Control

Specification

Volume: cc 0
