Full Face Mask Kirby Morgan®, M-48 Mod-1, No Pod

Art.Nr.: KM805175

Full Face Mask Kirby Morgan® M-48 Mod-1, No Pod.

The M-48 Mod-1 is the next generation of the popular original M-48 mask.
It still features the unique 2-cavity design. This allows the lower pod to be removed while topside to conserve air,
and allows normal speech while diving. It may also be used with a variety of different communication systems.

The lower pod is also removable under water to allow making gas switches, and to share gas in the event of an
emergency. The evolution of the mask has given way to a dramatic increase in visibility, an improved buckle system,
five leg straps, a mechanical equalizing device, and a variety of options for mounting external components, (lights, cameras etc.).

The mask should only be used for surface-supplied diving by divers trained and qualified in surface-supplied techniques and procedures.
A fully functional emergency gas supply system and body harness must always be used when diving the Mod-1 or any of the KMDSI
full-face masks models in the surface-supplied mode. When using this mask in countries that conform to CE standards the mask must only
be used with components that have been CE certified. The maximum recommended recreational diving depth for the Mod-1 with open
circuit scuba is 130 FSW (39 msw).

The full face mask has been tested and conforms to the performance requirements as set forth in Annex II of Directive 89/686/EEC and,
as far as applicable, the EN 250:2000 and EN 250/A1:2006. It is fully CE marked with Kirby Morgan SuperFlow® Plastic Adjustable 2nd Stage
Regulator " 805-120.#
